++All OMIC-sponsored risk management activities (live seminar, audio recording, online course) enable policyholders to obtain a 5% or 10% premium discount, which is applied upon renewal. Only one risk management credit is applied per policy year. Subject to discretion of OMIC, credit for a second event attended in the same policy year may be applied for the following policy year.

**\*Potential policy discount:** Participation in this loss prevention seminar may qualify ProAssurance physicians for a premium credit if they attend the full two-hour program and complete the activity evaluation and credit attestation survey. Contact your ProAssurance agent or business development manager to see if you qualify. Premium credits are subject to approval by the state insurance department and are applied at policy renewal.

## CONTINUING MEDICAL EDUCATION

### Accreditation Statement

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Medical Association of the State of Alabama through the joint providership of the Medical Foundation of Alabama and the Alabama Academy of Ophthalmology. The Medical Foundation of Alabama is accredited by the Medical Association of the State of Alabama to provide continuing medical education for physicians.

### Designation Statement

The Medical Foundation of Alabama designates this live activity for a maximum of 15.75 *AMA PRA Category 1 Credits*<sup>™</sup>. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

### Learning Objectives

After attending this course, participants will be able to:

- Describe evolving developments that will shape the future of cataract surgery, and the tools and techniques that optimize cataract surgery outcomes.
- Summarize current therapeutics and surgical procedures for management of glaucoma.
- Review the causes of and treatments for inflammatory diseases of the eye.
- Identify ways to ensure patient safety and use appropriate documentation and coding to optimize practice sustainability.
- Describe new surgical, medical and other techniques for treating various parts of the eye.
- Describe techniques for managing the oculoplastic needs of patients.
- Identify ways to manage dislocation of lens material and techniques for intraocular lens placement, exchange and fixation.
- List recommended communication techniques, surgical approaches and outcomes related to children.
